SUMMARY

13+ years of proven success designing and securing mission-critical infrastructure for global enterprises. **Multi-Certified Architect (CKS, CKA, AWS, GCP, OCI)** specializing in **DevSecOps**, zero-downtime migrations, and cross-border cloud orchestration (AWS, Azure, Alibaba Cloud).

- **High-Availability Architecture:** Expert in zero-downtime migrations & major version upgrades (PostgreSQL, Kafka/Strimzi) for complex, data-driven environments.
- **DevSecOps & Compliance:** Deep expertise in securing Kubernetes (CKS) and implementing global frameworks (NIS2, MLPS) to ensure rigorous data sovereignty and protection.
- **Automation & GitOps:** Driving operational excellence via Terraform, Ansible, ArgoCD, and extensive K8s orchestration.
- **Leadership:** Mentoring remote, high-performing teams to foster a culture of automation and continuous improvement.

Projects

AI Traffic Simulator (Hackathon Project) - 2025

[GitHub Repository](#)

- Co-developed a real-time traffic simulator using Amazon Q LLM, deployed on AWS infrastructure.
- Led infrastructure setup and **CI/CD deployment automation** using **Terraform and GitHub Actions**
- Integrated API with AI models and managed scalability for real-time simulation

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer

Oct 2022 – June 2025

KM.ON by Karyl Mayer, Hong Kong

- **Cloud Architecture:** Directed the design and optimization of scalable cloud infrastructure, ensuring cost-effective solutions.
- **Kubernetes Administration:** Architected, deployed, and implemented high-availability solutions, including stack upgrades for the technology platform.
- **Security:** Contributed to the MLPS and spearheaded the implementation of the NIS2 framework.
- **GitOps:** Managed the transition from legacy CI/CD systems to GitOps, enhancing automation and deployment reliability.
- **PostgreSQL:** Introduced the CNPG Postgres Operator for a project and managed the migration from PostgreSQL 13 to 17, ensuring zero downtime throughout the process
- **Load Balancer Migration:** Led the transition from Nginx to cloud-native load balancers, enhancing scalability and uptime through extensive load testing.
- **Kafka Migration:** Oversaw the migration from Confluent Kafka to Strimzi Kafka, ensuring zero downtime.
- **Team Leadership:** Guided and mentored a remote DevOps team, fostering a culture of collaboration, automation, and continuous knowledge-sharing to improve team efficiency and performance.

SKILLS & TECHNOLOGIES

- **Architecture & Design**
 - Zero-Downtime Migrations, Lift-and-Shift, High-Availability & Multi-Region Design, Database Major-Version Upgrades
- **Cloud Platforms**
 - AWS, Alibaba (**China**), Microsoft Azure, Oracle Cloud, GCP
- **Orchestration & Dockerization**
 - Kubernetes on clouds (EKS, ACK, OKE, GKE)
 - Kubernetes on-premises (Rancher, kubeadm, K3S, RKE), Docker, containerd
- **DevSecOps & Security**
 - MLPS (China), NIS2 (EU), Kubernetes, Cloud, Vulnerability Scanning (Trivy & Synk), VPN with MFA, OS Hardening, Mitigant
- **GitOps**
 - Bitbucket, Azure DevOps, GitLab, Jenkins, GitHub with OIDC Terraform, Helm, Ansible ArgoCD, Argo Workflow SOPS, KMS
- **Service Mesh**
 - Istio
- **Systems Administration**
 - Linux (deb & rpm), Windows Server, Active Directory

Senior DevOps Architect

Feb 2022 – Sep 2022

DevOps Architect

May 2020 – Jan 2022

Emumba Islamabad Pakistan

- Involved in hiring decision, interviews and placement of new resources
- Involved in technical mentoring, grooming and certification preparation of multiple team members of different tech stacks.
- Determines project requirements, develops project technical roadmap with deliverable and team work schedules.
- Proper task delegation, keeping check on progress and ensuring end goals are achieved.
- Keeping up-to-date with industry trends and developments.
- Identifying risks, bottlenecks and challenges and working with the team to form and implement contingency plans as soon as possible.
- Writing documentation including architectural design and deployment steps guide.
- Cross collaboration with different departments to resolve dependencies in a timely manner.
- Hands on contribution in general and specifically for any new technology area or project baseline deployment.
- Successfully drove multiple projects involving the architecture and deployment of Kubernetes environments across on-premises & cloud

DevOps Engineer

Dec 2018 – Apr 2020

Emumba Islamabad Pakistan

- Working with different teams to understand current bottlenecks and challenges.
- Create and maintain the build/deployment pipelines.
- Ensure maximum automation around running tests and deployments.
- Learning and implementing best build and deployment practices & principles.

System Administrator

Jun 2016 – Dec 2018

IBEX. – A TRG Company Islamabad Pakistan

- Managed AWS (EC2, RDS, S3, ELB, Auto Scaling) and Azure, Linux/Windows servers, and vSphere environments.
- Handled monitoring, CI/CD, deployments, backups, and security compliance.
- Collaborated with dev teams to ensure scalable, redundant, and secure production systems.

Sr. System Engineer

Jun 2012 – May 2016

IBEX. – A TRG Company Islamabad Pakistan

- Managed Linux/Windows systems, users, packages, logs, and VMs. Supported enterprise apps, VPN, patching, and network operations.
- Handled ticketing, documentation, and vendor coordination

System Administrator

Nov 2011 – Jun 2012

Kamal Laboratories, Rawalpindi, Pakistan

- Administered Windows servers, SQL/MySQL databases, backups, and monitoring.
- Managed LAN/WAN, hardware setup, and network troubleshooting. Maintained system integrity, availability, and documentation.

● Databases

- PostgreSQL (CloudNativePG Operator), SQL Server, MySQL, Amazon RDS

● Message Brokers & Event Streaming

- Apache Kafka, Strimzi Operator,

● Monitoring & Logging

- Prometheus, Grafana, ELK, Zabbix

● Networking

- LAN, WAN, DNS, TCP/IP, VPN, DHCP, FTP, SMTP

● Virtualization

- VMware, vSphere, Hyper-V, Oracle VM

● Web Servers & Domains

- Apache, IIS, GoDaddy

● Scripting

- Bash, Python

CERTIFICATIONS

● Security

- CCSK - Cloud Security
- CKS - Kubernetes Security

● Cloud & Kubernetes

- CKA - Kubernetes Administrator
- GCP Professional Cloud Architect
- AWS Solutions Architect – Associate
- OCI Multicloud Architect Professional (2025)
- OCI Architect Associate (2025)
- OCI AI Foundations Associate (2025)
- OCI Foundations Associate (2025)
- OCI Architect Professional (2021)

● GitOps

- Codefresh - GitOps Fundamentals

● System Administration & Security

- RHCSA
- MCSA / MCSE / MCITP (Windows Server Track)
- Microsoft Specialist: Azure Infrastructure
- Hyper-V & System Center Virtualization
- MCTS (SharePoint, AD, Applications Infrastructure, ISA Server)

● Networking & Virtualization

- CCNA (Cisco)
- Juniper JN0-101
- BCVRE (Brocade vRouter Engineer)
- VMware Certified Associate (VCA): DCV, Cloud, Workforce Mobility

EDUCATION

BSc (Computer Science)

Virtual University of Pakistan
